

In contrast, A series tools are sharper than B series. you could find another angle if you observe carefully and it will influence the effect of engraving

A series regular carbide engraving tools

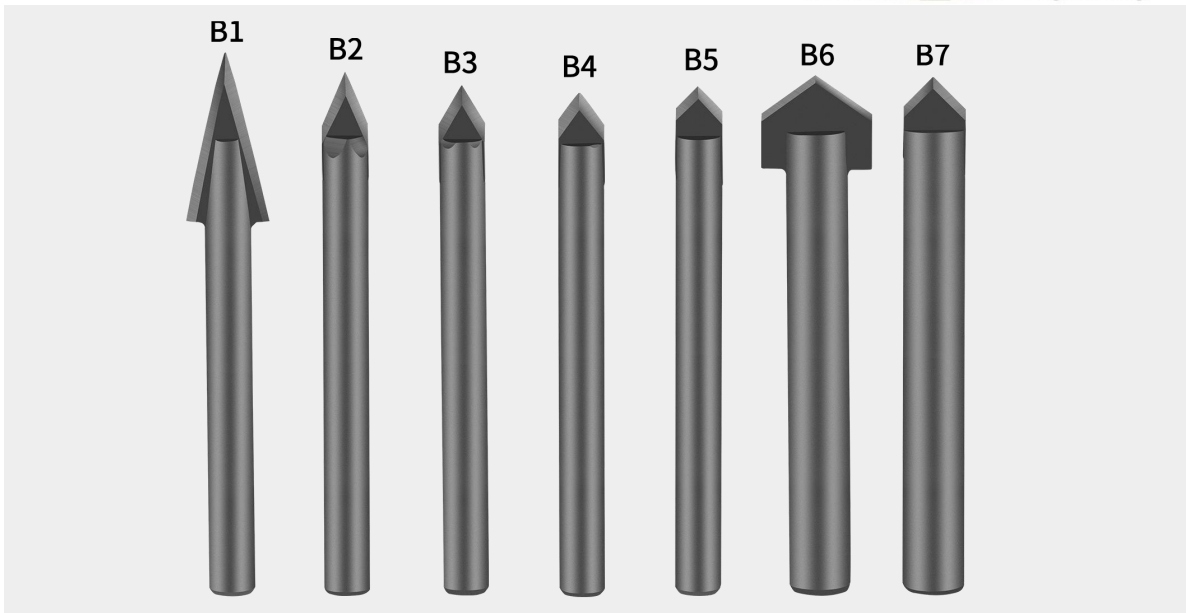

Adopt the high performance alloy material, double angle design, very sharp and can be reprocessed easily!

Applications: Bluestone, Marble

Picture	Item No.	Shk	Angle
	A1	6mm	30°
	A2	6mm	45°
	A3	6mm	60°
	A4	6mm	75°
	A5	6mm	90°
	A6	8mm	120°
	A7	8mm	90°

B series standard carbide engraving tools

Adopt the high performance alloy material, standard angle design, sharp and can achieve the fine engraving.

Applications: Bluestone, Marble

Picture	Item No.	Shk	Angle
	B1	6mm	30°
	B2	6mm	45°
	B3	6mm	60°
	B4	6mm	75°
	B5	6mm	90°
	B6	8mm	120°
	B7	8mm	90°

Vacuum brazed!

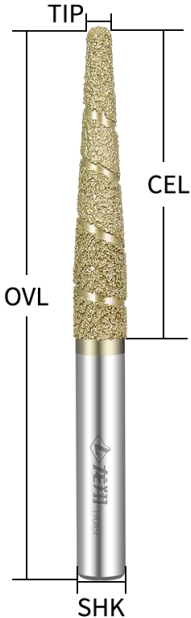

C series vacuum brazed diamond engraving tools

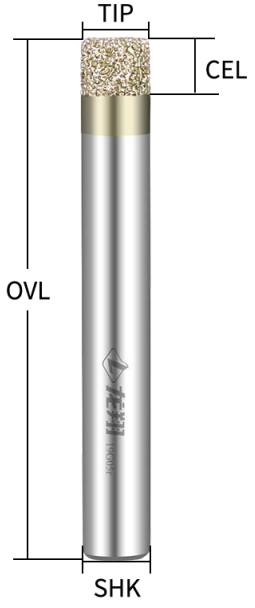

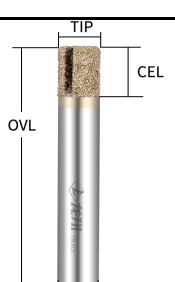

Adopt the high technology of vacuum brazing, characterized by sharp cutting, high efficiency, good wearing resistance, it's the preferred tool for relief, milling and cutting, and also for engraving letters.

Applications: Marble, Bluestone, Sandstone

F series sintered engraving tools

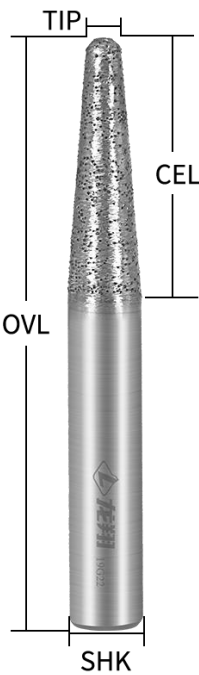

F series use the latest developed sintering formula, Compared with the original sintered tools, now our sintered tools have a qualitative improvement and show better wear resistance on granite.

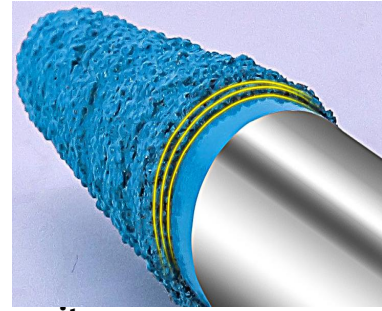

Applications: Granite
